FIBER OPTIC DISTRIBUTION BOX

AR-DB-CDO10P-HC-
70/30-1R-1B-8BL

1. DESCRIPTION

The equipment is used as an intermediate distribution point or a termination point for the feeder cable to connect with a drop cable in FTTx communication network system. The fiber splicing, splitting, and distribution can be done in this box by customer's requirement at the factory. This is a sealed unit and meanwhile it provides solid protection and management for the FTTx network building.

2. FEATURES

1. Totally enclosed structure.
2. Material: PP, moisture proof, waterproof, dust-proof, anti-aging, protection level IP68.
3. Clamping, splicing, fixation, storage and distribution of feeder cable and drop cable are integrated.
4. The interior is equipped with 1x2 FTB splitter (unbalanced or balanced) +1x8 PLC splitter or just 1x8 PLC splitter and the bottom cover is welded by ultrasonic welding, which is non-detachable.
5. The box body can be wall mounted or derrick mounted, suitable for indoor and outdoor use.

3. SPECIFICATION

1. Environmental requirement
